## Family Profiles

Karl Dean Logan, Born February 16, 1960 in Klamath Falls, Oregon

I grew up in Folsom California and completed most early education in Folsom. However, I obtained my High School Diploma from Springfield High, in Springfield Oregon. Post secondary education includes an Associate of Science Degree in Respiratory Therapy and a Bachelors Degree from Saint Mary's College in Moraga California. I also studied Business Administration at Cosumnes River College in Sacramento, California.

Out of College I worked as a Respiratory Therapist. After 12 years I moved my career into homecare and was in management and sales for 10 years before becoming an administrator for an Assisted Living company in Florence, Oregon. I currently work as a Respiratory Therapist at Peace Harbor Hospital in Florence. Other jobs I have held include: Farming (driving tractors, moving pipe, assisting with planting and harvesting), steel foundry, tree trimming, cement finishing, carpentry, roofing, maintenance, and even a dishwasher. Work related travel included California, Colorado, Florida, Idaho, Georgia, Utah, Washington, and of course travel throughout Oregon and one trip to Canada. As a manager, I have trained many employees and enjoyed the opportunity to share in their lives and help them experience management themselves.

I am married to Danita and have two children, Christina and Lindsey. Danita and I have lived in Oregon, Washington, and California. I have also lived for a short time in Nevada. We have vacationed in Canada and I have also traveled to Tijuana Mexico. We have been to Hawaii twice. One with the kids and once without. We did get to travel to Florida to Disney World when the kids were young.

I enjoy gardening, ATV's, fishing, hunting, camping, kayaking, hiking, mushroom hunting, home beer brewing, golfing, writing blogs and maintaining my family website.

I am most proud of my two children and their accomplishments. Christina is in college and Lindsey will attend college this fall. Both are amazing young women. As of 2011, I have been married for 28 years and in today's world that is a huge accomplishment in its self.

Odd twists include the fact that I was shot in the shoulder and caught on fire while priming a carburetor that resulted in 27% burns on arms, chest, and face and lived to tell about it are milestones. As another child from a broken home, I spent time living with my mother, father, uncle, and brother. I moved out when I was 17. I spent the next couple years in different jobs before moving to Oregon to go to college.

I love to entertain family and friends. Over the years I have thrown murder mystery parties, Halloween parties complete with a haunted house, and now I enjoy summer BBQ's at my two acres on Deadwood Creek.
